Things to Consider When Buying Cable Railing

Understand What You Are Buying

Not all cable railing is the same so make sure you are buying quality products. To assist you in understanding your choices, Feeney® gives you a list of items to look for when buying railing products.

✓ Is It a Quality Product?

Since quality standards vary from each manufacturer, here are some key questions to ask in regards to quality. Each manufacturer should have this information readily available for any buyer. The least expensive product may not always be the best one to choose.

- **Testing reports** are something that every manufacturer should have readily available to show the buyer a third-party validation of their products. Here are some test reports that you can require for your project:
 - » Salt Fog Exposure Test (ASTM B117)
 - » Performance and Compliance Testing
- **Warranty claim percentage** to sales is a key number for a buyer to get from a manufacturer. This will tell you how many product failures occurred during the product life cycle. Make sure you get the details on this one; for example, you will need the years that the manufacturer is using for their data.
- **Product composition** of materials used to make the product. Just like in the food you eat, you want to know what makes up the railing product being purchased. The ingredients and manufacturing process is key to knowing if the product you are buying will stand up years from now. Here is what we suggest for a cable railing product composition and manufacturing process:
 - » Marine Grade 316 stainless steel, for excellent corrosion resistance.

Component	Alloy	Reference Standard
Wire Rope	Type 316 Stainless Steel	AISI Type 316, ASTM A492
Threaded Terminal Fittings	Type 316 Stainless Steel	ASTM A276
Quick-Connect® Fittings		
Beveled Washers		
Nut Washers		
Decorative Caps		

- » Validated premium raw materials, manufacturer should confirm elemental composition prior to production.
- » Silicone protection seal for fittings with exposed cable insertion holes (9800/9900) must be on the fitting for added protection against dirt, debris and potentially corrosive elements from entering the body of the fitting.

✓ Can I Trust the Manufacturer?

Manufacturers will come and go, so make sure the one you choose will be there for you after the purchase. Feeney is the "original" cable railing manufacturer and we are 70+ years strong. Feeney will be here for you for years to come, with an expert staff to support you through the quoting, purchase, installation and after install care.

✓ Is It Easy to Install?

The easier cable railing is to install the more of a win-win it is for both buyer and contractor. Feeney has been making it easy for over 70 years, perfecting the art of cable railing. Whether it is Feeney engineered tools to assist with the install or our Patented Quick-Connect® fittings, choosing Feeney will make your project a breeze.

✓ Is It Safe and Code-Compliant?

See below for basic code requirements for railing installation.

International Code Council – International Residential Code (IRC):

1. **Section 104.11 Alternative materials, design and methods of construction and equipment.**
Supporting data, where necessary to assist in the approval of materials or assemblies not specifically provided for in this code, shall consist of valid research reports from approved sources.
2. **2012, 2015, 2018, 2021 IRC Section R311.7.8 – Handrails.**
Handrails shall be provided on not less than one side of each flight of stairs with four or more risers.
3. **2012, 2015, 2018, 2021 IRC Section R311.8.3 – Handrails Required.**
Handrail height, measured above the finished surface of the ramp slope, shall be not less than 34 inches (864 mm) and not more than 38 inches (965 mm).
4. **2012, 2015, 2018, 2021 IRC Section 312 – Guards.**
Guards shall be provided for those portions of open-sided walking surfaces, including stairs, ramps and landings, that are located more than 30 inches (762 mm) measured vertically to the floor or grade below at any point within 36 inches (914 mm) horizontally to the edge of the open side.

International Code Council – International Building Code (IBC):

1. **Section 104.11 – Alternative materials, design and methods of construction and equipment.**
2. **Section 1014 – Handrails.**
3. **Section 1015 – Guards.**

It's All in How You Frame It

Different frames call for different fittings.

Every railing project starts with a frame. Different frame materials call for different fittings, so Feeney has simplified the buying process by organizing our fittings based on the needs of the project. Our system is organized to assist you in choosing the right fitting for the right frame with ease.

PLEASE NOTE: FEENEY DOES NOT PROVIDE FRAME ON IMAGES PICTURED. TO LEARN MORE ON FRAMES FEENEY DOES PROVIDE, CHECK OUT FEENEYINC.COM/RAILING-SYSTEMS

SOLUTION B

CableRail Conceal Kits 11

SOLUTION C

Fittings + Cable 13

INSTALLER: TREELINE CONSTRUCTION
CABLERAIL KITS IN WOOD FRAME

SOLUTION A CableRail Kits

CableRail Kits are the most popular and cost-effective solution for wood railing frames and include everything needed to attach and tension a cable. They're designed for frames where there is access to drill through both end posts allowing the fittings to anchor to the outer faces of the posts.

Manufactured from high-quality 316-grade stainless steel for long lasting beauty. Click the code to learn more about **Standard Kits for Wood Frames** on our website.

Kits for Wood Posts
(6300 series) have 7-1/2" Threaded Terminal

Kits for wood posts

Our original CableRail system is an easy-to-install option for almost every project. It is packaged and ready to go in preset lengths and can be trimmed as needed in the field. Each kit includes the following:

Selected length of 1/8" diameter cable with Threaded Terminal pre-attached to one end

Level Railing Frame Options

Ordering Information:

6300 SERIES (1/8") FOR WOOD POSTS

Choose the increment based on your cable run length. Kits are available in bulk for large projects; ask your retailer for more information.

LEVEL KITS

20-ft	#6320-PKG	45-ft	#6345-PKG
25-ft	#6325-PKG	50-ft	#6350-PKG

All level kits can be used for stair applications using beveled washers.

LEVEL CONFIGURATION

Recommended Corner Options

TERMINATING

Double Corner

Single Corner*

*If you choose to have cables terminating at a single wood post offset drill holes at least 1/2-in.

CONTINUOUS

Kits available in 3/16" diameter cable and in longer lengths. Contact your local retailer to learn more or visit our website at feeneyinc.com

THREADED TERMINAL

Comes fastened to one end of the cable and attaches to an end post using a special Snug-Grip® Washer Nut. Simply spin the nut to adjust the final tension in the cable line and finish with a decorative End Cap (sold separately).

Don't Forget Your Pickets and End Caps!

*See page 32 for more details and ordering information.

QUICK-CONNECT® INSET FITTING

Features Quick-Connect® one-way locking jaws that allow the cable to easily slide through the fitting in one direction but automatically grab and lock-on after the cable is released. Just slip it on, pull the cable tight, cut off the excess, and finish with a decorative End Cap (sold separately).

PLEASE NOTE: FEENEY DOES NOT PROVIDE WOOD FRAME.

MAKE INSTALLATION EASIER—USE OUR FEENEY ENGINEERED TOOLS.*

- Quick-Connect® Release Tool:** For releasing the Quick-Connect® jaws to remove or adjust fitting.
- Cable Lacing Needle:** For quickly lacing cable ends through posts without snagging.
- Cable Tensioning Tool:** For quick and easy tensioning of cables.
- Cable Tensioning Gauge:** An easy-to-use tool for checking cable tension.
- Cable Cutters:** For shearing stainless steel cables.

*See page 31 for more details and ordering information.

Visit our website for technical specifications:

feeneyinc.com/technical-information

SOLUTION B CableRail Conceal Kits

CableRail Conceal Kits are an easy-to-install cable railing system which provide an alternative solution to our original CableRail Kits for customers looking for the look and feel of a slightly lower profile of the fittings on the end posts.

Manufactured from high-quality 316-grade stainless steel for long lasting beauty. Click the code to learn more about **Conceal Kits for Wood Frames** on our website.

Low Profile Kits for wood posts

A low-profile CableRail option with slender end caps and special compact cable fittings that hide inside the end posts for a completely symmetrical look. Each kit includes the following:

1/8" diameter cable with Conceal Terminal pre-attached to one end

Conceal Kits for Wood Posts (100 series) have a CR Conceal Terminal pre-attached.

Level Railing Frame Options

Ordering Information:

100 SERIES (1/8") FOR WOOD POSTS

Available in 5-ft increments starting at 5-ft (#105), all the way up to 50-ft (#150). Choose the increment based on your cable run length. These items are available in bulk for large projects; ask your retailer for more information.

LENGTH	100 SERIES (1/8")	LENGTH	100 SERIES (1/8")
5-ft	#105	30-ft	#130
10-ft	#110	35-ft	#135
15-ft	#115	40-ft	#140
20-ft	#120	45-ft	#145
25-ft	#125	50-ft	#150

All kits can be used for stair applications using beveled washers.

Recommended Corner Options TERMINATING

*If you choose to have cables terminating at a single wood post offset drill holes at least 1/2-in.

3221-PKG

3221-CURVE-PKG

Works with: **A B C A B C A**

HANGER BOLT INSTALLATION TOOL

For easy installation of hanger bolts used for Quick-Connect® Lag- and Pivot-style fittings.

3988-PKG

Works with: **A B C A B C A**

CONCEAL CAP REMOVAL TOOL

For removing a Conceal End Cap.

CCRT

Works with: **A B C A B C A**

CONCEAL TOOL KIT

Includes a Conceal Star Driver, a 1/2" and 9/16" Ratcheting Box Wrench, and a 5/32" T-Handle HexWrench.

Works with: **A B C A B C A**

CONCEAL STAR DRIVER

Part of a toolset used to install and tension Conceal CableRail Kits.

CSDT

Works with: **A B C A B C A**

Additional Components

INTERMEDIATE PICKETS (powder-coated aluminum)

Slender, low-maintenance, and time-saving picket option for wood frames up to 42-in high. Pre-drilled at 3" spacing for 1/8" cables. Slotted holes on stair pickets will accommodate stair slope between 20° and 45°. Includes base plates and attachment screws. Size 3/4" sq x 44-in long for level railings and 46-in long for stair railings. Trim to fit.

LEVEL RAILING PICKET

Black, 1 pack
7648 BLK-PKG

Silver, 1 pack
7648 SLV-PKG

White, 1 pack
7648 WHT-PKG

STAIR RAILING PICKET

Black, 1 pack
7649 BLK-PKG

Silver, 1 pack
7649 SLV-PKG

White, 1 pack
7649 WHT-PKG

BEVELED WASHERS (stainless steel)

For providing a flat bearing surface when attaching fittings at angled stair terminations. 32° angle to fit most stair angles (26° and 37° angles available as special order).

4 pack 3792-PKG fits Quick-Connect® Inset Fitting
4 pack 3799-PKG fits Threaded Terminals

BEVELED WASHERS FOR PROTECTOR SLEEVES (stainless steel)

Provides the ability to use protector sleeves on intermediate stair wood posts. (Special Order)

BW : PBW (Each)

PROTECTOR SLEEVES (stainless steel)

For protecting corner and stair transition posts from cable abrasion. Fits 1/4" diameter drill hole. For wood and composite posts only.

10 pack 3210-PKG

STAIR TRANSITIONS

DOUBLE POST CORNER

INTERMEDIATE PICKETS (stainless steel)

Slim, 3/8" diameter 316 stainless tube picket for wood frames up to 42-in high. Pre-drilled at 3" spacing for 1/8" cables. Slotted holes on stair pickets will accommodate stair slope between 20° and 45°. Includes all attachment hardware. Size 40-in or 46-in long for level (36-in or 42-in railings) and 51-in long for stair railings. Trim to fit.

LEVEL RAILING PICKET

Stainless, 1 pack SSPK 36L-PKG
Stainless, 1 pack SSPK 42L-PKG

STAIR RAILING PICKET

Stainless, 1 pack SSPK STR-PKG
Includes 3 stair top sockets to accommodate various stair slopes. Stair bottom sleeves are also available in custom order for stair frames with a bottom rail.

END CAPS

Decorative option for covering, protecting, and finishing the Quick-Connect® Inset Fittings and Snug-Grip® Washer Nuts.

STAINLESS STEEL

Dome style, 4 pack 3372-PKG
Crown style, 4 pack 3373-PKG
Chamfer style, 4 pack 3374-PKG

COLOR POLYETHYLENE

Black, 10 pack 7071-PKG
White, 10 pack 7072-PKG
Brown, 10 pack 7073-PKG
Gray, 10 pack 7074-PKG
Bronze, 10 pack 7077-PKG

CONCEAL COMPONENTS

CONCEAL END CAP

Available in select Feeney ColorEasy™ powder coat colors and stainless steel.

CCP

CONCEAL END CAP

Gray Plastic Cap

CCP : PL Gray

CONCEAL FLAT WASHER

29/64" X 7/8" OD 316-SS flat washer

CWW

CONCEAL STAIR BEVELED WASHER (stainless steel)

For providing a flat bearing surface when attaching both Conceal fittings at angled stair terminations. 32° angle to fit most stair slopes.

CableRail Order Checklist

Make your railing view friendly with the original stainless steel cable infill for wood, metal, and composite railing. Once again Feeney is making it easy for you to understand, find and purchase the original cable railing products.

Step 1: Take this brochure with the option that you like to your contractor or retailer.

Step 2: Tear this page out and hand to your contractor or retailer to start the estimating process.

Total LF of Railing needed

Height of Railing - 36" or 42"

Bottom Rail
36" (9 Cable Rows) / 42" (11 Cable Rows)

No Bottom Rail
36" (11 Cable Rows) / 42" (13 Cable Rows)

Wood Double Posts Single Posts

This checklist is to be used with your local contractor or retailer to begin the estimating process. To find a Feeney retailer or contractor go to feeneyinc.com/dealer-locator. Feeney is always here to help! You can call us at (800) 888-2418 or you may email us at sales@feeneyinc.com.

Railing Design Tips for CableRail

1 SELECT YOUR POST MATERIAL
CableRail infill works on railing frames with wood, metal, or composite-sleeved wood posts in either indoor or outdoor settings.

WOOD METAL
 COMPOSITE

2 SELECT YOUR CORNER TYPE
Double corner posts (recommended for wood and metal posts only) allow cables to either run continuously through a corner, requiring fewer fittings, or to easily terminate.

Single corner posts (recommended for composite-sleeved wood posts) are also an option and typically require the cables to terminate at the corner. (To use a single corner with CableRail Kits or CableRail Conceal Kits, one run will be offset by 1/2".)

(see website for additional options)

3 DESIGN TOP AND BOTTOM RAIL
Always include a strong, rigid, securely fastened **top rail** to provide necessary strength to the frame and help support the cable tension loads. Underneath the top rail, attach a minimum 1" x 4" **wood blocking** between posts to provide additional lateral reinforcement to the posts.

Bottom rails (optional) add rigidity to railing and can be an attractive and functional foot-rest addition to railing designs.

4 SELECT YOUR PICKET TYPE
Slender **intermediate pickets** may be used instead of some bulkier intermediate posts to achieve a more open railing design while maintaining proper cable spacing. (For picket options see Page 32)
