Parametric Ordering COLUMN WRAPS

Parametric Ordering: Custom Column Wrap Sizes

If a standard Column Wrap width or height doesn't work for your application, simply chose a Column Panel Style (page 49) and measure & supply the **WIDTH & HEIGHT** (as pictured, right) to our team!

Parametric Design allows you to order detailed Column Wraps at custom widths and heights at a competitive price point and a standard lead time. Since standard height detailed column wraps cannot be effectively trimmed to height in the field for non-standard height openings, parametric design allows you to maintain architectural integrity without compromising!
